

LandScope Map Viewer Preview Summary Instructions

1. Open a web browser to <http://ctx.natureserve.org>
2. Confirm the Citrix client is installed (if unsure, refer to the Connection Instructions in Appendix I)
3. Enter the following Log in information:
 - ✓ User Name = LS.Preview
 - ✓ Password = pR0gr@m (the 0 is a zero)
 - ✓ Domain = cocobolo
4. If you see the LandScope Folder, open It (if not, just go to the next step).
5. Open the Internet Explorer icon link, "LandScope Preview"
6. A new window will open to the staging version of the LandScope America web site
7. Click the map to go to the map viewer
8. Review map layers
9. Use the attached spreadsheet to provide feedback
10. When finished, close the window and logout of your Citrix session

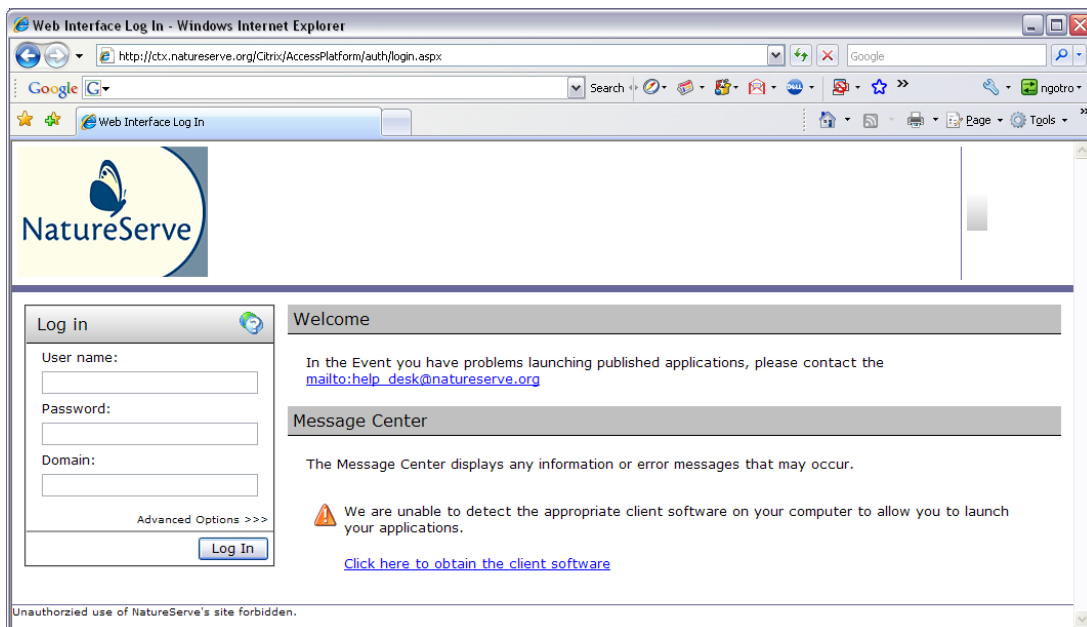

Appendix I

Connection Instructions

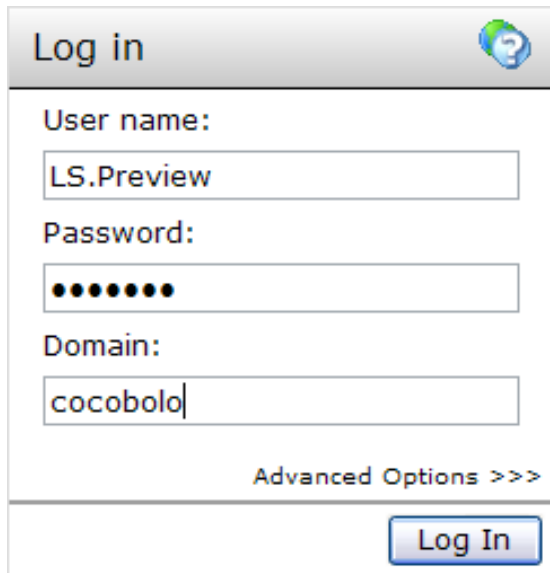

1. Save your work and close all applications. Please set aside 15-20 minutes to complete the setup and testing. You may be asked to restart your computer. You may not see all of these screenshots below as each or your computer configurations may be slightly different. If something goes wrong, please take a screenshot of the error or the last step you were on and send me an email, whitney_weber@natureserve.org.

2. Open Browser to <http://ctx.natureserve.org>

(I used Internet Explorer - I'm not sure if there are issues with using Firefox, so I would suggest you use Internet Explorer)

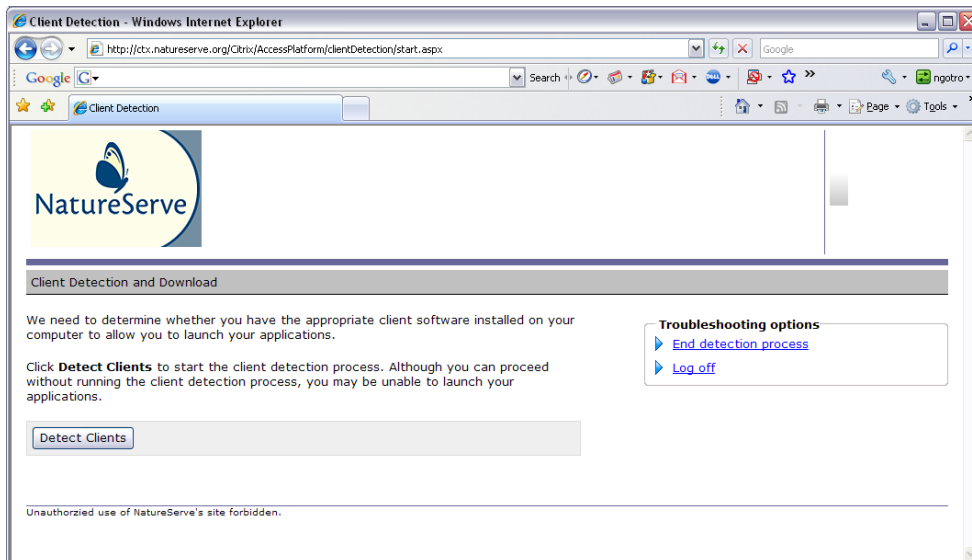

3. Enter User Name and Password

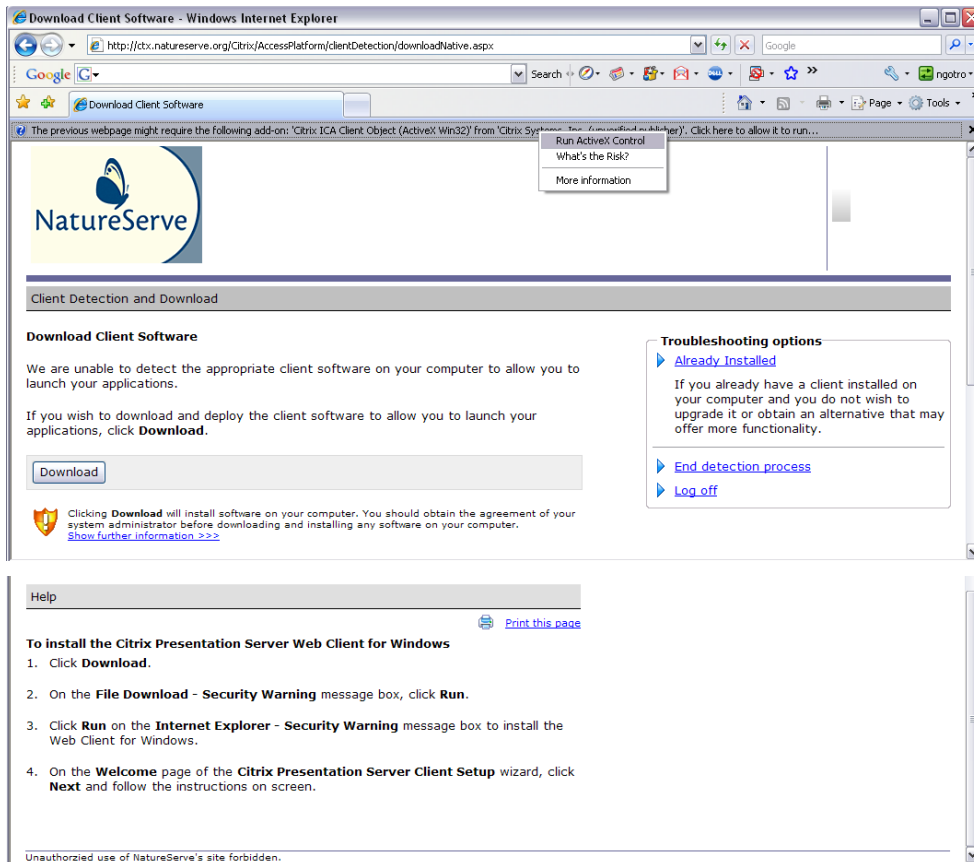

The image shows a 'Log in' form with a header bar containing the text 'Log in' and a question mark icon. Below the header, there are three input fields: 'User name:' with the text 'LS.Preview', 'Password:' with masked characters, and 'Domain:' with the text 'cocobolo'. Below these fields is a link 'Advanced Options >>>'. At the bottom right is a 'Log In' button.

4. Click > Detect Clients

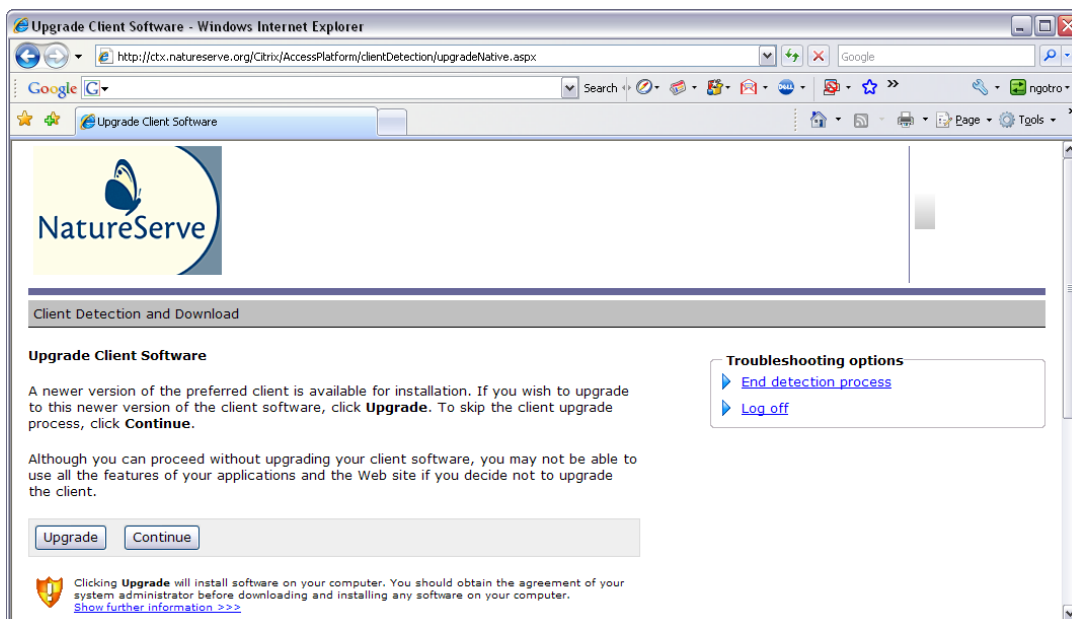

The image shows a web browser window titled 'Client Detection - Windows Internet Explorer'. The address bar shows the URL 'http://ctx.natureserve.org/ctx/AccessPlatform/clientDetection/start.aspx'. The page features the NatureServe logo and a section titled 'Client Detection and Download'. The text explains the need to determine if client software is installed. A 'Detect Clients' button is present. To the right, under 'Troubleshooting options', are links for 'End detection process' and 'Log off'. At the bottom, a message states 'Unauthorized use of NatureServe's site forbidden.'

5. Run ActiveX Control and Download the Client Software

6. I was asked to upgrade the client which I already had installed (you may be prompted to download the entire client, however)

7. Save and Run application

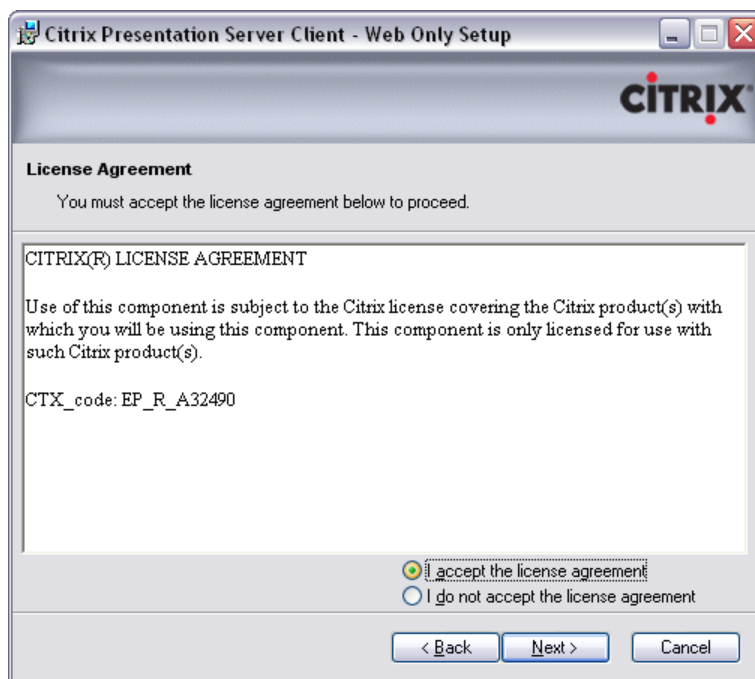

8. Click Yes

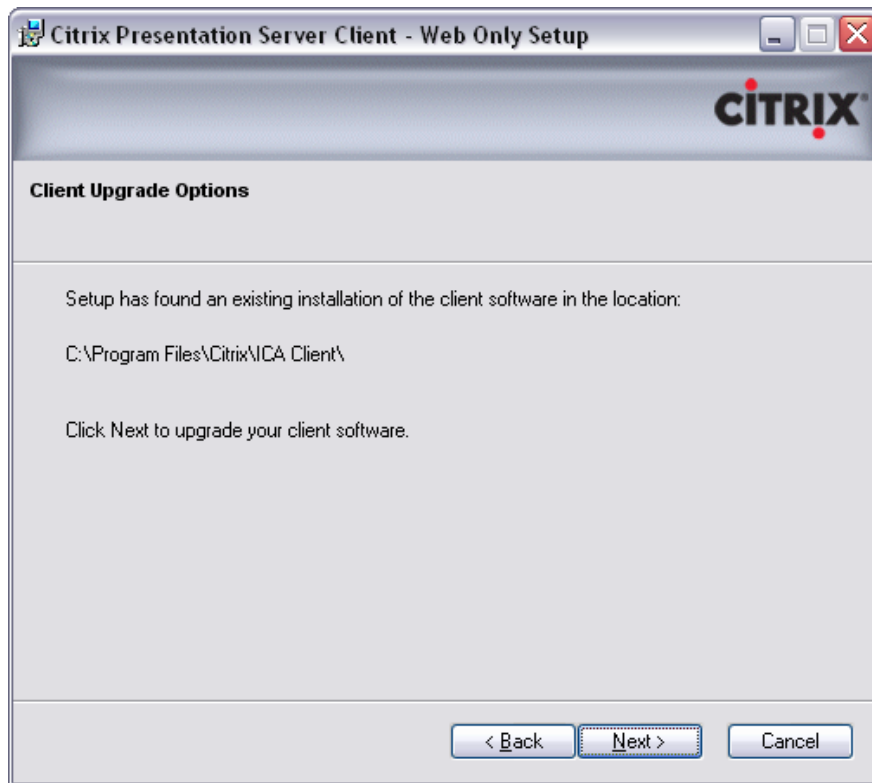

9. Click Next

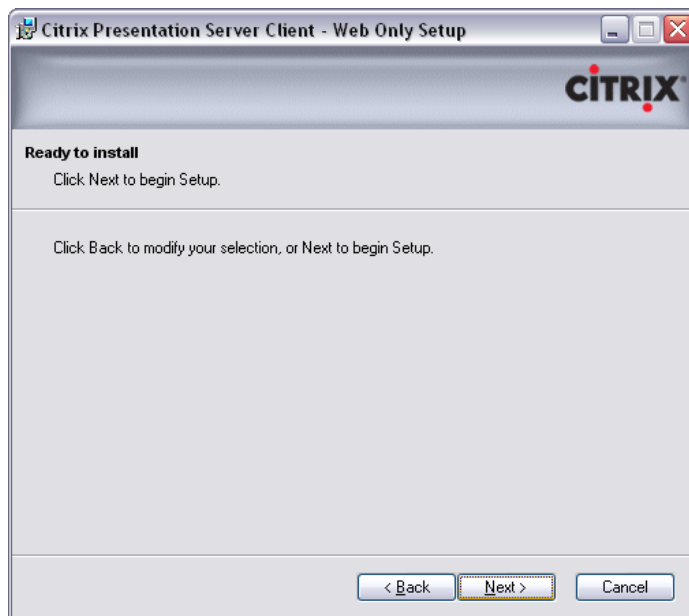

10. Accept the license agreement

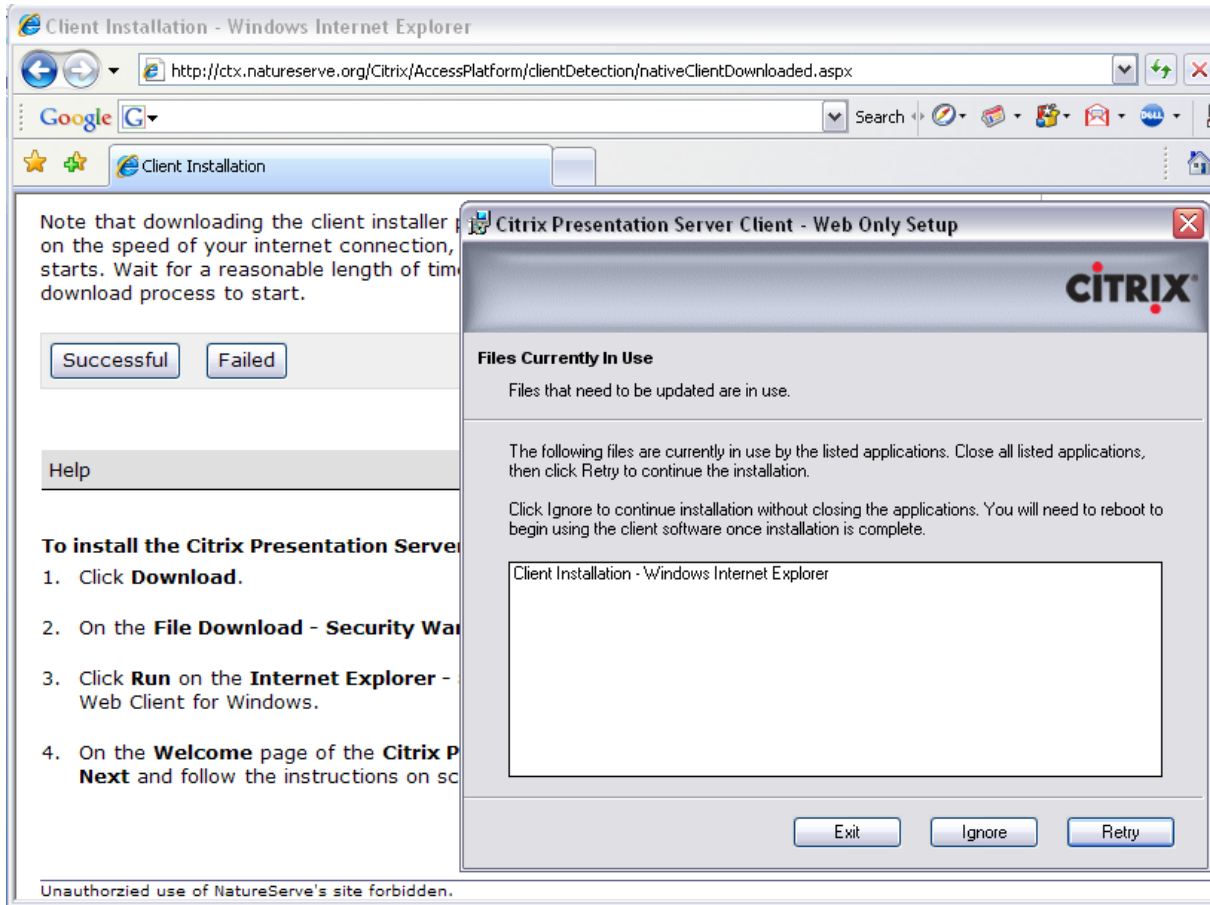

11. Click Next

12. Click Next

13. Heed the warning - Close the Browser, then Click > Retry

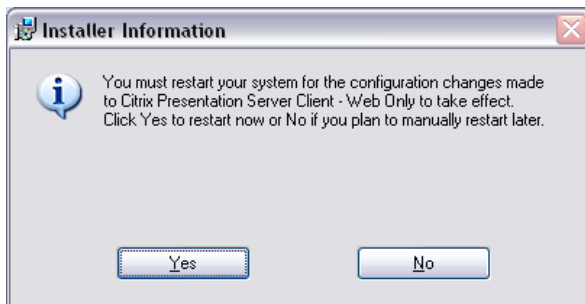

14. The installation should continue...

15. Click Finish

16. Restart your computer, if prompted

17. Repeat steps 1-3 above (Open Browser to <http://ctx.natureserve.org> and log in)

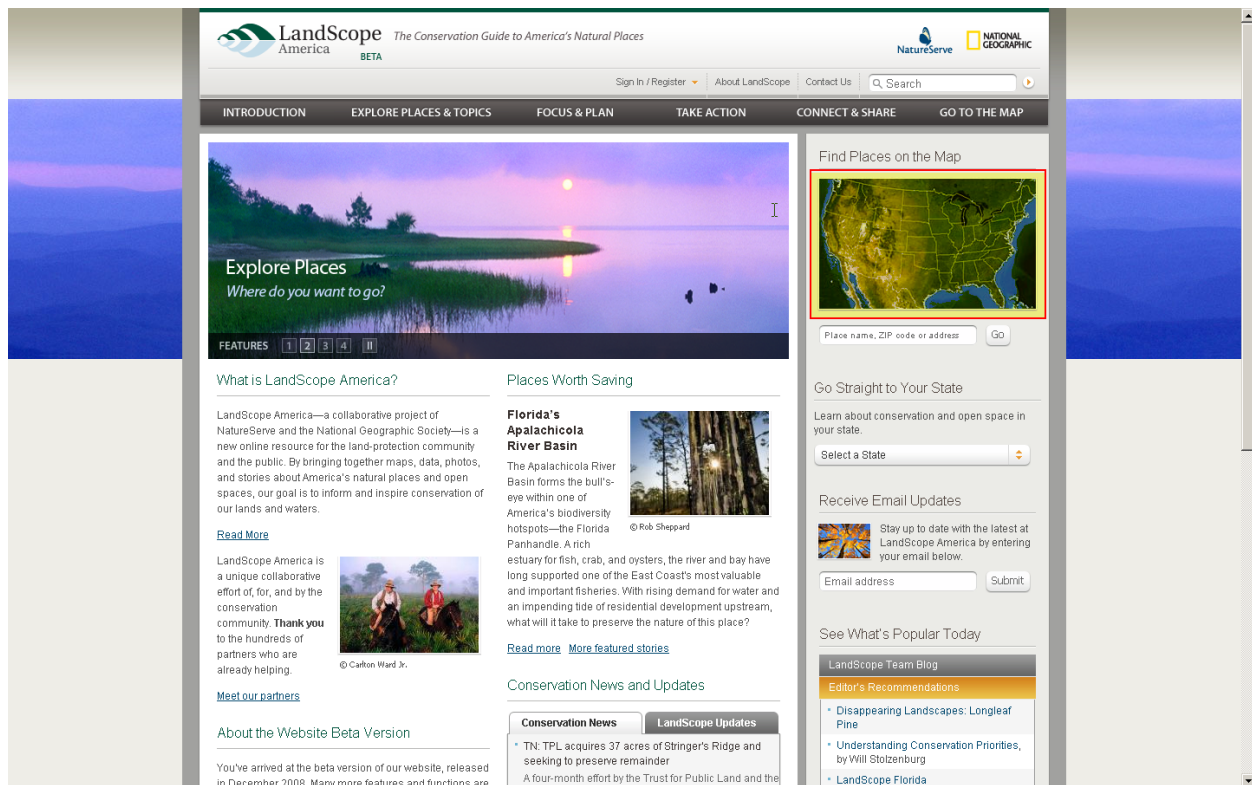

18. If you see the LandScope Folder, open it.

19. Open the Internet Explorer Link, "LandScope Preview"

20. A new window will open to the staging version of the LandScope America web site

21. Click the map to go to the map viewer
22. Review map layers

23. If you get lost, the homepage URL is <http://cherry:8080>
24. When finished, close the window and logout of your Citrix session
